

Green Plants

Module Information Sheet

A Brief Description

This learning module provides a thorough coverage of the important curriculum topic of 'Green Plants'.

"Green Plants" provides a series of exercises, many with 'advanced content' for the older child. Topics covered include the life cycle of the flowering plant, the importance of sunlight and water, and the names and functions of parts of the plant.

Tips on using "Green Plants"

The exercises and activities within Green Plants can be explored in any order - though it is best to leave the test zone until last.

Several areas of this topic have harder/more advanced options which are left as optional.
