

My First Forty Five Words

Module Information Sheet

A Brief Description

This learning module is designed for children who know their letters and are just beginning to recognise words. 'Letter Pools' lets them spell the words they recognise whilst 'Missing Words' encourages them to complete simple sentences by choosing the correct words. Both exercises cover the 45 'high frequency' words specified in the National Literacy Strategy.

Tips on using "My First Forty Five Words"

Select the chosen exercise by clicking on the 'ball' buttons at each level and then clicking on the necessary letters or words.
With the aid of visual indicators and voiceovers, both exercises are designed to be used largely unaided. However, textual instructions are also provided to enable adult assistance on computers without sound.
In both exercises, children are able to replay the words - with visual prompts - as often as they wish, to help reinforce "sight recognition".
